

Presentation of the ELO LATTE PRO control screen

The control screen of the ELO LATTE PRO machine consists of:

- A 4-digit control screen to facilitate adjustment operations, view alarms and errors,
- 6 recipe keys (from 1 to 3 and from 5 to 7) that can be adjusted according to your wishes (see next page),
- An On/Off button (9) to put the machine on stand-by or validation button during the adjustment procedure,
- "Cleaning" button (10) to start the machine cleaning operation at any time, and which allows you to enter the adjustment parameters,
- Stop button (11) which allows you to stop the recipe at any time
- And 2 buttons + / - (4 and 8) which allow you to modify the dose when making the selected recipe

For further information, we remain available at any time.

Possible setting parameters of the ELO LATTE PRO machine

For keys 1 to 3 and 5 to 7, it is possible to vary a certain number of parameters:

Type of recipe: you have the choice between 3 possibilities: hot milk froth, hot milk not frothed or switch off and make the button non-functional

Ri	Recipe type
000	Control key not functional
007	Programmable milk froth
008	Programmable hot milk

And modify the following parameters:

Recipe parameters (keys 1 to 3 and 5 to 7)			
P	Parameters	Description	Unit
002	Flux4	Milk quantity	0,1 sec
003	TempErog1	Milk Temperature	°C
004	Flux1	Delay to introduce air	0,1 sec
005	Flux2	Amount of rinse water before a cycle	0,1 sec
006	Flux3	Amount of rinse water after a cycle	0,1 sec
007	GrinderSpeed_valore	Pump rotation speed (foam fineness)	Volt
008	Decounter_flag	Down counter	ON-OFF

For further information, we remain available at any time.

ELO LATTE PRO machine settings procedure

1- In the STANDBY position (key 9 backlit), press and hold one of the 6 recipe keys (Button 1 to 3 and 5 to 7), the corresponding key lights up and the type of recipe is displayed on the control screen,

2- You can modify the type of recipe by pressing the corresponding recipe button (illuminated button) to switch to the 3 possibilities: Ri 07, Ri 08 or Ri 00
As soon as your selection is made, validate with the On/Off button (9),

3- The first parameter P002 then appears on the screen. To change the value of this parameter, press the "cleaning" button (10). The pre-recorded value then appears on the screen, and the modifier keys 1 and 5 light up. You can change this value by pressing key 1 (to increase) or key 5 (to decrease).

To confirm the new setting, press the On/Off button (9)

4- To advance to the other recipe parameters, press the corresponding recipe key (backlit key) to switch to pages P003, P004,.... Then follow the same procedure as paragraph 3 above

5- At the end of the modifications, press and hold the On/Off button (9) to validate the modifications

6- this operation can be performed on each recipe key (button 1 to 3 and 5 to 7)

For further information, we remain available at any time.
